1 About this document

1.1 Function

This document provides all the information you need for the mounting, set-up and commissioning to ensure the safe operation and disassembly of the switchgear. The operating instructions enclosed with the device must always be kept in a legible condition and accessible.

1.2 Target group of the operating instructions: authorised qualified personnel

All operations described in the operating instructions manual must be carried out by trained specialist personnel, authorised by the plant operator only.

Please make sure that you have read and understood these operating instructions and that you know all applicable legislations regarding occupational safety and accident prevention prior to installation and putting the component into operation.

The machine builder must carefully select the harmonised standards to be complied with as well as other technical specifications for the selection, mounting and integration of the components.

The information contained in this operating instructions manual is provided without liability and is subject to technical modifications.

1.3 Explanation of the symbols used

Information, hint, note: This symbol is used for identifying useful additional information.

Caution: Failure to comply with this warning notice could lead to failures or malfunctions.
Warning: Failure to comply with this warning notice could lead to physical injury and/or damage to the machine.

1.4 Appropriate use

The Schmersal range of products is not intended for private consumers.

The products described in these operating instructions are developed to execute safety-related functions as part of an entire plant or machine. It is the responsibility of the manufacturer of a machine or plant to ensure the correct functionality of the entire machine or plant.

The safety switchgear must be exclusively used in accordance with the versions listed below or for the applications authorised by the manufacturer. Detailed information regarding the range of applications can be found in the chapter "Product description".

1.5 General safety instructions

The user must observe the safety instructions in this operating instructions manual, the country specific installation standards as well as all prevailing safety regulations and accident prevention rules.

Further technical information can be found in the Schmersal catalogues or in the online catalogue on the Internet: products.schmersal.com.

2 Product description

2.1 Ordering code

Product type description:
AZ 17-(1) Z (2) I-(3)-(4)-(5)

(1)

11	1 NO contact/1 NC contact
02	2 NC contact

(2)

without	Latching force 5 N
R	Latching force 30 N

(3)

without	M16 cable gland
ST	M12 connector

(4)	
B1	Actuator B1
B5	Actuator B5
B6L	Actuator B6L
B6R	Actuator B6R

(5)	
1637	Gold-plated contacts

2.2 Special versions

For special versions, which are not listed in the ordering code, these specifications apply accordingly, provided that they correspond to the standard version.

2.3 Purpose

The safety switches with separate actuator are suitable for sliding, hinged and removable safety guards, which need to be closed in order to ensure the necessary operational safety.
The safety switches are used for applications, in which the hazardous situation is terminated without delay when the safety guard is opened.

When the safety guard is opened, the NC contacts are positively opened and the NO contacts are closed.

The safety switchgear units are classified as type 2 interlocking devices in accordance with EN ISO 14119 and are rated as highly coded.

The user must evaluate and design the safety chain in accordance with the relevant standards and the required safety level.

The entire concept of the control system, in which the safety component is integrated, must be validated to the relevant standards.

2.4 Warning about misuse

In case of improper use or manipulation of the safety switchgear, personal hazards or damages to machinery or plant components cannot be excluded. There are no residual risks, provided that the safety instructions as well as the instructions regarding mounting, commissioning, operation and maintenance are observed.

2.5 Exclusion of liability

We shall accept no liability for damages and malfunctions resulting from defective mounting or failure to comply with the operating instructions manual. The manufacturer shall accept no liability for damages resulting from the use of unauthorised spare parts or accessories.

For safety reasons, invasive work on the device as well as arbitrary repairs, conversions and modifications to the device are strictly forbidden, the manufacturer shall accept no liability for damages resulting from such invasive work, arbitrary repairs, conversions and/or modifications to the device.

2.6 Technical Data

認証

証明書	cULus
-----	-------

一般データ

規格	EN ISO 13849-1 EN ISO 14119 EN IEC 60947-5-1
EN ISO 14119に準拠したコーディングレベル	High
アクティブ原理	電気機械式
ハウジング 材質	樹脂、グラスファイバー強化熱可塑性樹脂、自己消火性
アクチュエーターの材質	ステンレス鋼
総重量	100 g

一般データ - 仕様

より強いラッチ力	Yes
動作方向の数	2
補助接点数	1
安全接点数	1
ケーブルグラントの数	1

安全性評価

規定	EN ISO 13849-1 EN IEC 60947-5-1
パフォーマンスレベル、最大	c
カテゴリ	1
B _{10D} 常閉接点 (NC)	2,000,000 操作
注記	電氣的寿命要問合せ
B _{10D} 常開接点 (NO)	1,000,000 操作
注記	@10%I _e および抵抗負荷
ミッションタイム	20 年

安全性評価 - 障害の除外

注意:	Can be used when fault exclusion for dangerous damage to the 1-channel mechanism is permissible and sufficient protection against manipulation is guaranteed.
パフォーマンスレベル、最大	d
カテゴリ	3
注記	適切なロジックユニットで、2チャンネル使用する場合
ミッションタイム	20 年

機械的データ

機械的寿命、最小	1,000,000 操作
ラッチ力	30 N
強制開離距離	11 mm
NC接点あたりの正方向ブレーク力、最小	17 N
作動速度、最大	2 m/s
取り付け	ネジ
固定ネジの種類	2x M4
ハウジングカバー用固定ネジの締め付けトルク、最小	0.7 Nm
ハウジングカバー用固定ネジの締め付けトルク、最大	1 Nm
注記	Torx T10

機械的データ - 電気機械式

ケーブル引込口	M16 x 1.5
接続	端子のIDC方式
認定ケーブル断面積、最小	4 mm
認定ケーブル断面積、最大	8 mm
ケーブル断面積、最小	0.75 mm ²
ケーブル断面積、最大	1 mm ²
使用可能ケーブル	柔軟な

機械的データ - 寸法

センサー長	30 mm
センサーの幅	30 mm
センサーの高さ	85 mm

環境条件

保護等級	IP67
使用周囲温度	-30 ... +80 ° C
保管および輸送温度	-30 ... +85 ° C
許容される設置高度/標高（海拔）、最大	2,000 m

環境条件 - 絶縁値

定格絶縁電圧 U_i	250 VAC
定格インパルス耐電圧 U_{imp}	4 kV
過電圧カテゴリー	III
汚染度	3

電氣的データ

熱試験電流	10 A
-------	------

要求定格短絡電流	1,000 A
スイッチエレメント	1 NO 接点、1 NC 接点
注記（スイッチエレメント）	with double break
スイッチ原理	slow action, positive break NC contact
最大スイッチング周波数	2,000 /h
接点材質、電氣的	銀

Electrical data – Safety contacts

電圧、使用カテゴリ AC-15	230 VAC
電流、使用カテゴリ AC-15	4 A
電圧、使用カテゴリ DC-13	24 VDC
電流、使用カテゴリ DC-13	4 A

Electrical data – Auxiliary contacts

電圧、使用カテゴリ AC-15	230 VAC
電流、使用カテゴリ AC-15	4 A
電圧、使用カテゴリ DC-13	24 VDC
電流、使用カテゴリ DC-13	4 A

Note about the safety classification

Basically suitable up to Cat. 1 / PL c.

With 2-channel usage with fault exclusion mechanism (if a fault exclusion to the 1-channel mechanics is authorised) and suitable logic applicable up to Cat. 3 / PL d

$$MTTF_D = \frac{B_{10D}}{0,1 \times n_{op}} \quad n_{op} = \frac{d_{op} \times h_{op} \times 3600 \text{ s/h}}{t_{cycle}}$$

(Determined values can vary depending on the application-specific parameters h_{op} , d_{op} and t_{cycle} as well as the load.)

If multiple safety components are wired in series, the Performance Level to EN ISO 13849-1 will be reduced due to the restricted error detection under certain circumstances.

3 Mounting

3.1 General mounting instructions

Please observe the remarks of the standards EN ISO 12100, EN ISO 14119 and EN ISO 14120.

The mounting position however must be chosen so that the ingress of dirt and soiling in the used opening is avoided. Use the supplied base plate for the fixing. The tightening torque of the fixing screws must not exceed 150 Ncm. The enclosure must not be used as an end stop. Any position is possible. The mounting position however must be chosen so that the ingress of dirt and soiling in the used opening is avoided. The unused opening must be sealed by means of slot sealing plugs.

3.2 Mounting of the actuator

The marks on the used actuator opening of the solenoid interlock and on the actuator must be opposite.

The actuator must be permanently fitted to the safety guards and protected against displacement by suitable measures (tamperproof screws, gluing, drilling of the screw heads).

Please observe that, when fixing the switch e.g. by means of rivetting or welding, the insertion depth of the actuator is not modified. Different actuator forms are available. The actuators B1 and B5 are preferably used for sliding and removable safety guards. For hinged guards, the B6R and B6L actuators.

Actuator B6L / B6R

When the switch is fitted on a hinged safety guard, please ensure that the point of rotation is located within the range of the upper surface of the safety switch, in which the actuator hook is inserted (refer to table).

Actuating radii [mm]	 over the small edge of the actuator		 over the wide edge of the actuator	
	R_{min}	d	R_{min}	d
	B6L 50	11	50	11
B6R	50	11	50	11

The axis of the hinge must be d mm above and in a parallel plane to the top surface of the safety switch. The basis setting provides a minimum radius of R_{\min} .

The B6L or B6R actuators are set to the smallest radius in factory. To increase the radius, the setting screws $a + b$ must be turned by means of a hexagonal key A/F 2.0 mm.

3.3 Dimensions

All measurements in mm.

Actuator

Straight actuator B1

Angled actuator B5

Flexible actuator B6L

Flexible actuator B6R

4 Electrical connection

4.1 General information for electrical connection

The electrical connection may only be carried out by authorised personnel in a de-energised condition.

The contact labelling can be found in the wiring compartment of the switch. Appropriate cable glands with a suitable degree of protection are to be used.

IDC method of termination

The IDC method of termination (cut clamp technology) enables connecting flexible wires with cable section 0.75 ... 1 mm² without using conductor ferrules. To this effect, strip the wire for 17 ... 20 mm and insert it into the cable gland, close the cable gland, push the conductors in the groove of the cover (refer to wiring example) and screw the cover back. Alternatingly tighten the cover screws uniformly. Tightening force for the Torx T10 cover screws 0.7 ... 1 Nm.

4.2 Contact Options

Contacts are shown with safety guard closed. All NC contacts have positive break .

with connector, A-coding

Key	
	Automatic opener, NC contact
	Normally-open contact
	Normally-closed contact

5 Set-up and maintenance

The safety function of the safety components must be tested. In the case of correct installation and adequate use, the safety switchgear features maintenance-free functionality. A regular visual inspection and functional test, including the following steps, is recommended:

1. Check for correct installation of the actuator and the switch
2. Check the integrity of the cable entry and connections
3. Check the switch enclosure for damages
4. Remove particles of dust and soiling

Adequate measures must be taken to ensure protection against tampering either to prevent tampering of the safety guard, for instance by means of replacement actuators.

Damaged or defective components must be replaced.

6 Disassembly and disposal

6.1 Disassembly

The safety switchgear must be disassembled in a de-energised condition only.

6.2 Disposal

The safety switchgear must be disposed of in an appropriate manner in accordance with the national prescriptions and legislations.
