

EN Operating instructions. page 1
Original

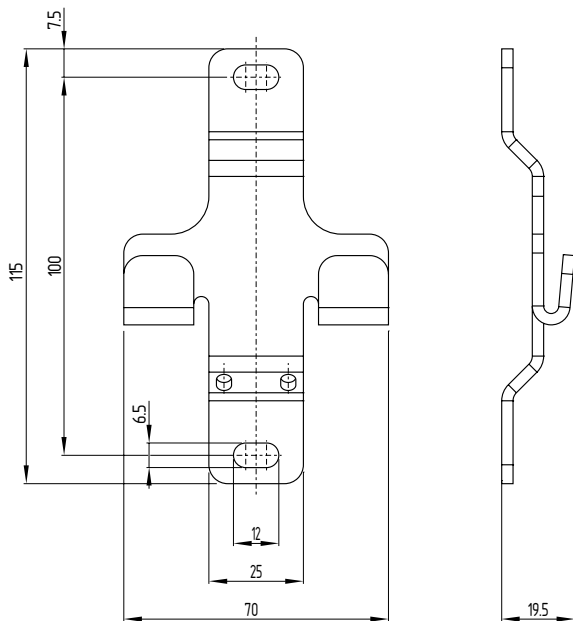

Purpose

On accessible protective equipment, the lockout tag prevents persons from being inadvertently being trapped.
When accessing the hazardous area, the operating or service staff fixes a padlock to the lockout tag. 1 to 6 padlocks (not included in delivery) with a maximum shackle diameter of 6 mm can be fixed.

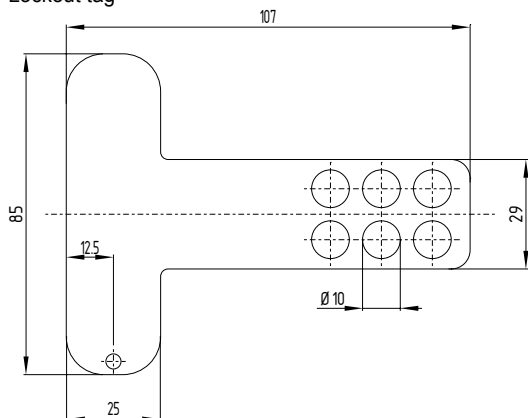

Dimensions

All measurements in mm.

Retaining strap

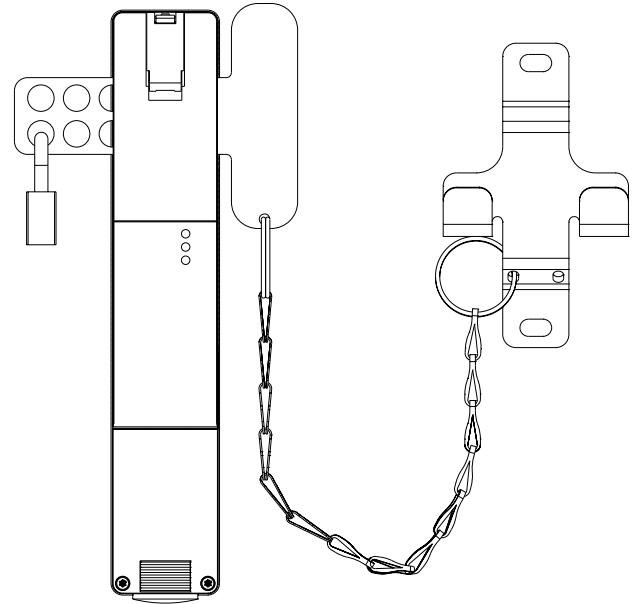

Lockout tag

Application

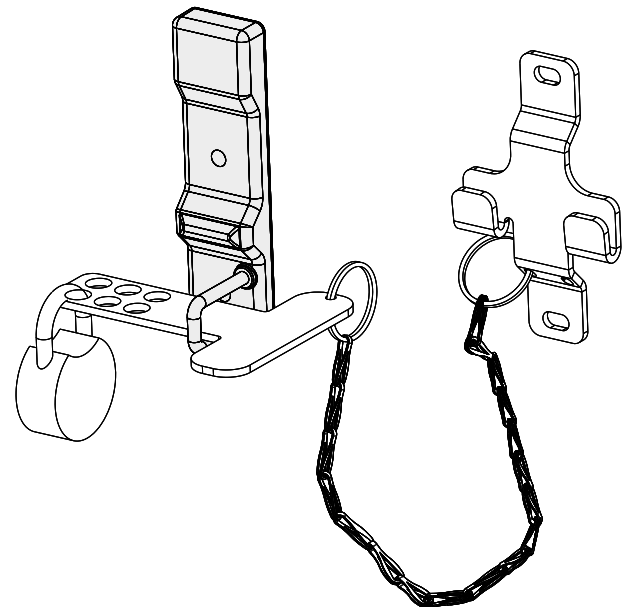

Usage of SZ 200-1 with safety switch AZ 200/AZ 201 or solenoid interlock AZM 200/AZM 201

The lockout tag blocks the insertion hole of the actuator. In this way, the door of the guard system cannot be closed and accidental start of the machine is prevented.

Usage of SZ 200-1 with solenoid interlock AZM 300

The lockout tag is pushed through the actuator bracket such that the rotary handle cannot be placed in the "Guard system closed" position. In this way, the door of the guard system cannot be closed and accidental start of the machine is prevented.
